## **Introduction**

Our policy at Grand Avenue is to set regular home learning according to the age and ability of each child. We believe that home learning is an essential part of education. Home learning is defined as activities work or research which pupils can do at home. The links between progress at school and home learning are well researched and show that regular, well structured and relevant home learning greatly enhances children's achievement.

We believe that home learning is valuable because it can;

- develop a pupils' ability to work independently
- reinforce skills taught in the classroom
- encourage self organisation and self motivation
- strengthen links between school and home
- establish work patterns that need to be developed at secondary school and in later life
- promote the enjoyment of reading
- provide opportunities for structured research
- promote a sense of responsibility

## **Routines**

The type of home learning set will change as the child progresses through school. It will range from learning letter sounds and numbers in the early years to detailed research projects in years 5 and 6.

The home learning set will follow a prescribed routine, for example maths on Thursdays, spellings on Fridays. Parents will be notified via a curriculum newsletter as to the routine for their child. A home learning letter outlining the tasks and return days is sent home from each individual year group every Thursday. Home Learning is optional in EYFS and KS1.

## **Time**

The time spent by each child on home learning will vary according to age, motivation and ability. Children work at different speeds, and their ability to concentrate on the appropriate task can differ widely. A Home learning time grid is produced for parents information – see below.

## **Parental Support**

We believe that at an early age the value of home learning can be greatly enhanced by the attitude and commitment of parents. Parental support is essential and thus Home Learning is included in the Home /School partnership agreement, signed by all families on admission to school. We ask for an attitude of positive encouragement to support the child. The school advises that a regular time set aside at home, along with a quiet place to work, encourages children to develop long term strategies for their future needs.

A Curriculum newsletter sent home each term gives specific information on topics to be covered, routines and what type of activities can be undertaken at home.

Information and guidance on how to support a child with their reading can be found within the reading diary.

Parents can help their children in a number of ways by, for example:

- singing their child's reading record three times a week (once a week in Year 6)
- taking an interest in the home learning set
- checking the presentation of the home learning
- encouraging the child to complete the home learning
- praising the child for attempting/completing the home learning
- checking spellings in written work
- testing what needs to be learnt, e.g. tables, spellings
- listening to the child read and responding to the content of the book
- visiting the local library/museum
- promoting the use of IT to aid home learning
- providing a suitable place to complete the home learning
- encouraging the child to complete home learning in time given and to return home learning on due date
- revising previous spellings and tables
- encouraging and supporting independent research

### **Further Considerations**

- Children may also receive home learning from our Inclusion Manager. This will be set accordance with our policy in a routine manner with a clearly marked return date.
- There is support in place for pupils who persistently do not return home learning. These vary according to year group. Home learning club is available for a small number of pupils.

### **SEND/More Able**

Children may find Home Learning a challenge due to SEND. In this instance every effort is made by the teacher to differentiate the tasks set for the class to meet these needs. More Able pupils may be asked to extend their learning with appropriate tasks given to further challenge and motivate.

### **Conclusion**

To enable all our children to reach their potential the work undertaken at home is regarded as both vital and supportive of the school's endeavours. Parents are asked, via the Home/School Agreement, to support their children throughout their time at school especially in Year 6 when they are preparing for their transfer to secondary school.

### **Supporting Policies:**

Feedback Policy
